CODE 1: Household Types:

1-Dual (male and female spouses)

2- Female headed with another adult male decision-maker

3- Male headed but with another adult female decision-maker

4-Female headed, without an adult male decision-maker in the household

5-Male headed, without a female adult decision-maker in the household

Introduction and Consent

Before the beginning of the interview read out the following paragraph and ensure that the respondent understands before asking for consent.

“Good morning/afternoon. We are coming from (_partner organization’s name_)__ with permission from the local government. We are conducting a survey to understand how farming decisions are made, what different agricultural practices you use, your household’s access to information, extension services, and credit, and your participation in community groups. We would like to ask you some questions that should take no more than three hours of your time. We would like to share some of this information widely in order that more people understand how food is grown and land managed in this region and the issues that you face regarding access to and use of agricultural information and credit. Your household was selected for this survey because you participated in a previous survey (IMPACT Lite). We want to combine that information with this new information. Your name will not appear in any data that is made publicly available. The information you provide will be used purely for research purposes; your answers will not affect any benefits or subsidies you may receive now or in the future. Do you consent to be part of this study? You may withdraw from the study at any time and if there are questions that you would prefer not to answer then we respect your right not to answer them.

Has consent been given? (01=Yes, 00=No)

[_ _]

CONSENT

Ask the following to the Adult Male Decision-Maker:

1. Do you consider yourself the main male decision-maker in the household?
2. Do you consent to provide information?

Ask the following to the Adult Female Decision-Maker:

1. Do you consider yourself the main female decision-maker in the household?
2. Do you consent to provide information?

Additional members?									

1.11 Does the Household Head have any additional wives who are not listed above? 1 Yes>>1.12 2 No >> Section 2 A household is defined as people who live and eat together at least one season per year.	1.12 How many other wives does the household head have? >>1.12b
CODE	NUMBER

If the household head has more than one wife who is not considered to be a member of this household, please list the names of all additional wives in the table below and answer the questions:

1.12 b What is the name of the wife?	1.12c How many children does [person] have?	1.12 d Where does [person] live? 1-Different household, same compound 2- Same village 3-Different village 4-City/Urban Area	1.12e Does this wife maintain any agricultural plots or livestock that are not included in the map in section 2? 1-Yes 2-No 3-Unsure
NAME	NUMBER OF CHILDREN	CODE	CODE

2: Sketch of the Farm

Please sketch a quick map of all the plots that your household used throughout the past 12 months. This drawing should indicate a sketch of the farm, including intercropping and the seasonality when different crops appear in plots. It also includes ponds or grazing areas owned by the household. This is to be done with both the male and female respondent together. Both enumerators—and their respondents—should agree on the number and order of the subplots that they have included.

3. Landownership and Plots

Enumerator will verify plots. Enumerator will also ask who controls/manages each plot and subplot. Please try to make sure that the plots, subplots, and seasons referenced correspond to the data collected in the IMPACT lite survey round.

3.1 Plot Numb er	3.2 Land ownership (explanations in code book) 1- Own land and own use,>>3.3 2 - Renting out>> 3.3 and 3.4, then skip to next plot 3 - Renting in>>3.5 4 - "Pure" Sharecropping in >>skip to 3.5 5 - "Pure" Sharecropping out >>3.3 and 3.4 then skip to next plot 6 - "Cost-sharing" Sharecropping in>>3.5 7- "Cost-sharing" Sharecropping out>>3.3 and 3.4, then skip to next plot 8 - Communal land>>3.3 9 - Borrowed land in>>3.5 10 - Borrowed land out >>3.3 and 3.4 then skip to next plot Other, specify	3.3 Land title (only if owned) 1- Government title 2 - Customary tenure [no written title: inherited, family, or clan land] 3 - No title 4 - Leased in from government 5 - Private lease Other (specify)	3.4 Who in the household owns the plot? Member ID(s) Write -99 if not owned by household member	3.5 Subplot/crop	3.6 Season	3.7 Who made the majority of agricultural decisions for this subplot/crop? Member IDs, up to 3	3.8 Was this subplot/crop irrigated in the past season? 1- Yes>>3.9 2-No>>next crop	3.9 What was the source of irrigation water? 1 - River, stream 2 - Canal/Channel 3 - Constructed pond, reservoir, or pan 4 - Natural lake or pond 5 - Well, tubewell, or borehole 6 - Sewerage Water 7 - Spring, natural Other (specify)	3.10. What was the extraction method used for irrigation? 1 - Gravity 2 - Treadle pump 3 - Rower pump 4 - Diesel pump 5 - Electric pump 6 - Tractor pump 7 - Bucket/hose Other (specify)	3.11 What Was the irrigation type? 1 - Flood 2 - Furrow 3 - Bed and furrow 4 - Bucket/hose 5 - Sprinkler/drip Other (specify)

Which climate shocks have significantly affected your household (income or livelihood) during the last 5 years? (List up to 5 major shocks) If no shocks >>section 11 1-Floods 2- Droughts 3- Storms/Strong Winds 4- Erratic Rainfall 5-Frost 6-Cold Spells 7-Heat waves 8-Fires Other (please specify) Climate shocks are unpredicted weather events beyond normal expectations	When was the shock? (year in last 5 years)	How widespread was the shock? 1- Only in my household 2- Some households in village 3- Most households in village 4 -Many households in the district 5- All households in the district	What were the primary results of the shock? (List up to Three)	What immediate actions did your members of your household take? (List up to three)	Who took the action? If respondents mention all members of the household, please enter code 55.	[Please verify if the household sold assets to cope with the shock? If not mentioned in 10.5, please ask if they sold or pawned any assets (including crops, livestock, land, household goods etc).] 1. Yes 2. No >> If No, move to 10.10	Please record the asset(s) sold to cope with shock.	Who owned the asset(s) that was sold?	Who in the household was most affected? (Multiple Member IDs allowed) If respondents mention all members of the household, please enter code 55.	Why was this person (s) most affected?

*Please only ask this section if respondents have reported observing climate change (answering **yes** in Question 11.1) or answered that it is **somewhat likely, likely, or very likely** that they will be affected by future climate changes in 11.5.

13. Personal Values

We are interested in knowing which life-guiding principles or values you have that guide your choices and decisions. With that in mind, please rate the following statements based on your own personal values.

	Statement	1 - Strongly Disagree	2 - Somewhat disagree	3 - Neither agree nor disagree	4 - Somewhat Agree	5 - Strongly agree
13.1	I actively seek out advice about agricultural practices for my farm.					
13.2	If spouses (males and females) make household agricultural decisions together, their livelihood will improve (agricultural productivity, food security, income etc).					
13.3	Everyone in the community should show respect for cultural traditions relating to agricultural practices.					
13.4	It is important to challenge oneself and to learn and try new things.					
13.5	It is important to help and assist those who do not have the resources to make agricultural changes themselves.					
13.6	I highly value new agricultural information, technology, and weather information.					
13.7	We need to protect natural resources because they are important for our livelihoods.					
13.8	Members of the community should work together to improve the community (maintaining common areas, infrastructure, etc.).					
13.9	Traditional solutions and methods for agriculture will help to resolve all the problems we face.					
13.10	I am often one of the first people in my community to try new practices on my farm.					
13.11	Religious teachings will help us to meet any challenges we face in life, including changes in climate.					
13.12	When making agricultural decisions, I am most concerned about generating income.					
13.13	I am willing to accept agricultural advice from outside sources.					
13.14	I make my own agricultural decisions without worrying about what other people say.					
13.15	I have an active role in community-decision-making.					

		1 Strongly Disagree	2 Somewhat disagree	3 Neither agree nor disagree	4 Somewhat Agree	5 Strongly agree
13.16	I compete with my neighbors to see who can have a better farm.					
13.17	One of the problems with people today is that they challenge authority too often.					
13.18	It is important to have protection of one's own property rights.					
13.19	My community is welcoming to new agricultural ideas and practices.					
13.20	Co-operation with others usually works.					
13.21	Being a farmer is an important part of my identity.					
13.22	When making agricultural decisions, I am most (very) concerned about food security.					
13.23	I am capable of improving my life and the lives of members of my household.					
13.24	The land use and agricultural changes that I have implemented will help me to reduce my vulnerability to climate change.					
13.25	I trust members of my community to help me in times of need.					
13.26	The livestock changes that I have implemented will help me reduce my vulnerabilities to climate changes.					
13.27	I trust my family to help me in times of need.					
13.28	It is important to me to be able to pass my farm/land on to my children.					
13.29	I feel a very strong connection to the land that I farm.					
13.30	Men and women should have equal roles in agricultural decision-making
