

Household Questionnaire modules for the Women's Empowerment in Agriculture Index

Example Questionnaire for Uganda: International Food Policy Research Institute (IFPRI)

NOTE: This instrument is the same version as the original household questionnaire included in the Women's Empowerment in Agriculture pilot survey for the Uganda case study. This information can be used in conjunction with the Individual level questionnaire to construct and validate the index. Modules highlighted in **green** are required; modules or questions highlighted in **blue** are used for validation. Note that this instrument must be adapted for country context including translations into local languages when appropriate.

Informed Consent for Women's Empowerment in Agriculture Index (REQUIRED)

Informed Consent: Before beginning the interview, it is necessary to introduce the household to the survey and obtain their consent to participate. Make it clear to them that their participation in the survey is voluntary. Please read the following statement in the language of interview:

Thank you for the opportunity to speak with you. We are a research team from [XXXX] working in collaboration with [XXXX]. We are conducting a survey to learn about agriculture, food security and wellbeing of households in this area. You have been selected to participate in an interview which includes questions on topics such as your family background, dwelling characteristics, asset ownership and income earning activities. The survey includes both a section to be asked about the household generally, in addition to sections which will be asked to a primary adult male and female in your household if applicable. These questions in total will take approximately 1.5 hours to complete and your participation is entirely voluntary. If you agree to participate, you can choose to stop at any time or to skip any questions you do not want to answer. Your answers will be completely confidential; we will not share information that identifies you with anyone. After entering the questionnaire into a data base, we will destroy all information such as your name which will link these responses to you.

We will also interview other households in your community and in other parts of Uganda. After we collect all the information we will use the data to make a study about how various programs can be most helpful to the people in this area. Do you have any questions about the study or what I have said? If in the future you have any questions regarding study and the interview, or concerns or complaints we welcome you to contact [XXX], by calling [XXX]. In addition you can contact the head of Ethics Review at [XXX]. We will leave one copy of this form for you so that you will have record of this contact information and about the study.

Please ask the participants (male and female) if they consent to the participation in the study (check one box):

Participant 1:	YES	<input type="checkbox"/>	NO	<input type="checkbox"/>	Participant 2:	YES	<input type="checkbox"/>	NO	<input type="checkbox"/>
----------------	-----	--------------------------	----	--------------------------	----------------	-----	--------------------------	----	--------------------------

I _____, the enumerator responsible for the interview taking place on _____, 2011 certify that I have read the above statement to the participant and they have consented to the interview. I pledge to conduct this interview as indicated on instructions and inform my supervisor of any problems encountered during the interview process.

If the household does not give consent to all of the data collection, stop the interview and inform your team leader. Team leaders will discuss the reason for this refusal and decide whether a partial data collection is possible for this household.

Consent form approved by IFPRI IRB on August 16, 2011 and by UNCST on August 18, 2011.

DEFINITION OF HOUSEHOLD AND RESPONDENTS (REQUIRED)

A **household** is a group of people who live together and take food from the “same pot.” In our survey, a household member is someone who has lived in the household at least 6 months, and at least half of the week in each week in those months. Even those persons who are not blood relations (such as servants, lodgers, or agricultural laborers) are members of the household if they have stayed in the household at least 3 months of the past 6 months and take food from the “same pot.” If someone stays in the same household but does not bear any costs for food or does not take food from the same pot, they are not considered household members. For example, if two brothers stay in the same house with their families but they do not share food costs and they cook separately, then they are considered two separate households. Generally, if one person stays more than 3 months out of the last 6 months outside the household, they are not considered household members. We do not include them even if other household members consider them as household members.

Exceptions to these rules should be made for:

Consider as household member:

- A newborn child less than 3 months old.
- Someone who has joined the household through marriage less than 3 months ago.
- Servants, lodgers, and agricultural laborers currently in the household and will be staying in the household for a longer period but arrived less than 3 months ago.

Do not consider as household member:

- A person who died very recently though stayed more than 3 months in last 6 months.
- Someone who has left the household through marriage less than 3 months ago.
- Servants, lodgers, and agricultural laborers who stayed more than 3 months in last 6 months but left permanently.

This definition of the household is very important. The criteria could be different from other studies you may be familiar with, but you should keep in mind that you should not include those people who do not meet these criteria. Please discuss any questions with your supervisor.

The **primary and secondary respondents** are those which are self identified as the primary members responsible for the decision making, both social and economic, within the household. They are usually husband and wife, however can also be another member as long as there is one male and one female aged 18 and over. It may also be the case that there is only a primary respondent if that person is a female and there is no adult male present in the household.

MODULE B. HOUSEHOLD LISTING AND DEMOGRAPHICS (REQUIRED). Enumerator: Ask these questions about all household members. The respondent should be the one most knowledgeable about the age, completed education, and other characteristics of household members.

MODULE E. LAND AND AGRICULTURE Enumerator: Ask this section to the member with most knowledge about household land and agriculture. Respondent ID:

READ: Now I am going to ask you a series of questions about the land your household lives on, uses for productive purposes-- that is leases or sharecrops, owns or rents out. I would like you to consider not only the land your household uses now, but also the land your household may have used during the last growing season. Please start with the largest piece of land and move to the smallest piece of land in terms of area. By piece of land, I mean one continuous piece, which is used predominantly for the same purpose and managed by the same person or group of people. Include the homestead and home garden production.

Land No.	What is the land name?	What is the area of [LAND]?		What is the ownership status of the [LAND]?	Who owns [LAND]?			Whose name is on the title or other document of [LAND]?			What is the tenancy status of [LAND]?	If you made any improvements on [LAND] (such as irrigation, building structures, etc) in the last 12 months, who made the decision to make the improvement?			If you were to buy a similar plot as [LAND] today, how much would you pay (counting all improvements)?	What was the main use of [LAND] during the last growing season?
